Software testing for companies | QA training for individuals

01.
Automated Testing
Automating repetitive checks and regularly verifying the product's behavior after changes.

02.
Manual Testing
Checking the product's features and user scenarios; documenting issues and retesting after fixes.

03.
API Testing
Verifying data exchange and response accuracy between systems and components.

04.
Performance Testing
Evaluating the product's speed, responsiveness, and behavior under load.

05.
Security Testing
Identifying and documenting potential security weaknesses within the agreed scope.

06.
Accessibility Testing
Identifying barriers that prevent people with different needs from using the product.

07.
Closed Beta Testing
Selected participants use the product, and issues, usage experience, and feedback are collected.

Why Clients Rely on Us

Companies | Graduates

"We started working with GenofIT at a very early stage of Rebut's development. From our very first meeting, it felt less like working with an external service provider and more like collaborating with friends and fellow c…

Mikheil Janelidze
Founder & CEO at Rebut Inc.

"The process was very comfortable and professional, and I felt the team's full support throughout. They know exactly what they're doing. The consultation I received during the testing process helped me a lot in the furth…

Avtandil Zenaishvili
Founder at Jobs Review

"In working with GenofIT, what Pear valued most was the simple, transparent, and effective communication with the testing team. The team stood out for its high level of professionalism, adherence to agreed…
